

1. Calculate Marks for Assessments

- As a student, I want the system to calculate my total marks for a specific unit based on the individual assessment scores I enter.

2. Set Target Mark for a Unit

- As a student, I want to set a target mark for a unit, and the system should provide calculations for the marks needed in future assessments to achieve that target.

3. Visualize Progress Towards Target Mark

- As a student, I want a visual representation (e.g., a chart or graph) of my progress towards the target mark for a specific unit, so I can track my performance over time.

4. View Detailed Assessment Breakdown

- As a student, I want to view a detailed breakdown of my marks for each assessment within a unit, including scores for individual questions or tasks.

5. Customize Weightage for Assessments

- As a student, I want the ability to customize the weightage of different assessments within a unit, allowing me to adjust the impact of each assessment on the overall unit mark.

6. Receive Notifications for Important Milestones

- As a student, I want to receive notifications when I achieve specific milestones, such as reaching the target mark for a unit or completing all assessments.

7. Export Marks Data for Analysis

- As a student, I want the ability to export my marks data in a downloadable format (e.g., CSV or PDF) for further analysis or sharing with instructors.

8. Set Reminders for Upcoming Assessments

- As a student, I want to set reminders for upcoming assessments or deadlines, helping me stay organized and prepared.

9. Access Marks Information Across Devices

- As a student, I want to access my marks information from any compatible device, ensuring convenience and flexibility.

10. Provide Insights and Recommendations

- As a student, I want the system to provide insights and recommendations for improving my performance based on historical data and patterns.
